A. Maths - Data

You are required to perform a survey to collect data. It is your choice on what kind of data you want to collect. Your data could include people’s favourite food, what sports team they follow, or what job would be their dream job. You will need to survey a minimum of 15 people. In class this week we have looked at different ways to present data and once you have gathered your own data you will need to choose an appropriate way to present it.

Once you have completed this you need to interpret your findings. Make at least five observations about what you can tell by looking at your graph/display.

B. English - Character Bio

A character biography gives great background knowledge. They can establish a back-story, detail personality traits, appearance, occupations, strengths, location and even family history. You will need to construct two of these from the following options:

Kaitlyn – Two Weeks in Grade Six
BFG – The B.F.G
Gregg Heffley – Diary of a Wimpy Kid
Mr. Twit – The Twits
A character from a book of your choice

You are required to make a character bio for two of these characters. Examples of what should be incorporated into a character bio can be found on the blog.
